Te Pūkenga Here Tikanga Mahi

Allied Public Health, Scientific and Technical workers, public health & mental health nurses and assistants, and health digital, advisory and policy workers have voted to strike on November 28.

Each of our bargaining is different - but with the coalition Government's austerity approach to health, it's no wonder we face shared challenges.

We're striking because:

- **Health NZ's offers don't address chronic understaffing issues** that stop us providing the level of care patients deserve. Unsafe staffing means unsafe workplaces.
- **Ridiculous recruitment delays** add to unsafe staffing, and result in members working unsustainably long hours.
- **The pay offers are effectively a pay cut** during a cost-of-living crisis. We risk losing more health workers to Australia.

Overworked, undervalued health workers can't deliver the excellent care whānau deserve.

Let's stand together for healthcare that looks after everyone.

Check emails & talk to delegates for bargaining info. Strike & picket info:
